

We've made the Sustainable Switch

DID YOU KNOW?

8.3 billion plastic straws pollute our oceans every year.

One million seabirds and 100,000 marine mammals are killed annually from plastic in our oceans.

It takes up to 200 years for plastic straws to decompose and can't be recycled in most places.

So why is there still a whopping 10 million plastic straws being used in Australia each day ?

We've decided to step up and make the **sustainable switch** to eco-friendly paper straws!

Plastic straws

Paper straws

Sourced from natural materials

FSC certified

Home and commercially compostable converted into nutrients back to the Earth.

We thank you for your support in our fight against plastic pollution and reducing our impact on the environment. A small switch can make a big difference to pave the way for a more sustainable future!
